

Year 6 Spring 2022 Theme: Our planet, our home

- We will be exploring geographical diversity and how human behaviours are influenced by their environments, as well as the human impact on the physical landscape of biomes.
- Our journey will begin with a Stunning Start Day, where the children will be exploring how to establish their own settlement in an unfamiliar biome. They will be using a range of resources to research the key features of their chosen biome.
- We are changing the way we showcase our themes, so pop back at the end of Spring term to see our End-of-theme celebration work.
